Fri, 27 Apr 2012 23:53:00 GMT Sorensen Sge 160-63 Programmable Power Supply 10 kW 160V 63A - Introduction: The measurement of insulation resistance is a common routine test performed on all types of electrical wires and cables. As a production test, this test is often used as a customer acceptance test, with minimum insulation resistance per unit length often specified by the customer. Mon, 10 Dec 2018 13:26:00 GMT Insulation Resistance (IR) Values | Electrical Notes ... - The results obtained from IR Test are not intended to be useful in finding localized defects in the insulation as in a true HIPOT test, but rather give information on the quality of the bulk material used as the insulation.. Even when not required by the end customer, many wire and cable manufacturers use the insulation resistance test to track their insulation manufacturing processes, and ...
