Thu, 06 Dec 2018 21:09:00 GMT directed self assembly of pdf - Self-assembly is a phenomenon where the components of a system assemble themselves to form a larger functional unit. This spontaneous organization can be due to direct specific interaction, collective effects, and/or occur indirectly through their environment. Wed, 05 Dec 2018 13:32:00 GMT Self-assembly of nanoparticles - Wikipedia - Self-assembly is a process in which a disordered system of pre-existing components forms an organized structure or pattern as a consequence of specific, local interactions among the components themselves, without external direction. When the constitutive components are molecules, the process is termed molecular self-assembly.
