Ionizing radiation, such as from gamma rays, x-rays, or electron beams, is energy that can be transmitted without direct contact to the source of the energy capable of freeing electrons from their atomic bonds in the targeted food. The radiation can be emitted by a radioactive substance or generated ... Food irradiation - Wikipedia - Sterilization (or sterilization) refers to any process that eliminates, removes, kills, or deactivates all forms of life and other biological agents (such as fungi, bacteria, viruses, spore forms, prions, unicellular eukaryotic organisms such as Plasmodium, etc.) present in a specified region, such as a surface, a volume of fluid, medication, or in a compound such as

biological culture media.
