When in static equilibrium, the acceleration of the system is zero and the system is either at rest, or its center of mass moves at constant velocity. Thu, 29 Nov 2018 17:14:00 GMT Statics - Wikipedia - Friction is the force resisting the relative motion of solid surfaces, fluid layers, and material elements sliding against each other. There are several types of friction: Dry friction is a force that opposes the relative lateral motion of two solid surfaces in contact. Dry friction is subdivided into static friction ("stiction") between non-moving surfaces, and kinetic friction between moving ... Tue, 16 Oct 2018 07:43:00 GMT Friction - Wikipedia - MORAN
